Summary

Front-end developer specializing in React and Next.js, building high-performance, responsive, and accessible web applications. Experienced in integrating GraphQL/Apollo and REST APIs, managing state with Redux and React Query, and converting Figma designs into reusable UI components using Tailwind, Material UI, and Chakra UI. Skilled in unit testing, performance optimization, and SEO best practices. Currently contributing to production Next.js applications at CodeToon. BFA graduate with a Frontend Development Diploma.

SKILLS

HTML/CSS, react.js, tailwind CSS, Bootstrap, GraphQL, restful API, javaScript, GSAP, Git/GitHub, Axios, Framer Motion, Material UI, React Query, Formik, React Hook Form, shadcn, React Router DOM

EXPERIENCE

09/2025 -

Present

CodeToon - software house

Built and maintained responsive and scalable user interfaces using Next.js and React. Integrated GraphQL APIs with Apollo Client to optimize data fetching, caching, and overall application performance.

Developed and executed unit and integration tests using React Testing Library to ensure component reliability and prevent regressions.

Refactored core UI/UX components to improve consistency, accessibility, and maintainability. Translated design systems into reusable and modular component libraries.

Collaborated within a Git-based workflow, contributing to CI/CD pipelines, including branching strategies, pull request reviews, and auto

Projects

09/2025 -

12/2025

[Egypt Best Properties — Real Estate Platform \(Front-end Developer\):](https://egyptbestproperties.com/en/)
<https://egyptbestproperties.com/en/> 🔗

- Contributed to a production-level real estate web platform by translating UI/UX designs into responsive, accessible, and reusable components
- Developed dynamic pages and components using modern frontend practices, with focus on performance and scalable architecture for property listings
- Implemented advanced search and filtering functionality for properties (location, price, type, and developers) to enhance user experience
- Built responsive, mobile-first interfaces ensuring consistency across devices using Tailwind CSS and modern UI/UX best practices

- Improved overall UI/UX across multiple sections of the platform to enhance usability, clarity, and user engagement
- Optimized SEO structure and metadata across pages, improving organic visibility and search engine performance for real estate-related queries
- Ensured performance optimization through efficient rendering strategies and reusable component design patterns
- Collaborated in a Git-based workflow to manage features, updates, and production releases in a structured development process

02/2026 –
04/2026

[CodeToon – Corporate Website \(Front-end Developer\):](https://codetoon.net/)
<https://codetoon.net/> [↗](#)

- Contributed to a production-level Next.js (App Router) application by translating Figma designs into responsive, accessible, and reusable UI components
- Developed pages and components using Next.js, leveraging code-splitting and lazy loading to improve performance and initial load time
- Built pixel-perfect, responsive interfaces using Tailwind CSS following modern UI/UX best practices
- Implemented smooth and accessible animations with Framer Motion, optimizing performance for production use
- Integrated Apollo Client with GraphQL APIs, including caching strategies and custom error handling for improved data management
- Developed unit and integration tests using React Testing Library to ensure component reliability and prevent regressions
- Collaborated in a Git-based workflow with a CI/CD pipeline to support structured development and deployment processes
- Applied technical and on-page SEO optimizations that improved the website's organic visibility and ranking performance for branded search terms.

EDUCATION

09/2018 –
07/2023 **A Bachelor of Fine Arts degree, Helwan University**
graduation project excellent
